ORGANIC SKINCARE PRODUCTS

What is organic skincare?

Organic skincare products are made of natural ingredients without any chemical elements in them. The ingredients used in them are organically farmed and do not contain genetically modified materials, synthetic residues, or chemicals.

What type of business is this ?

B2C, or business to consumer, is the type of commerce transaction in which businesses sell products or services to consumers.

In the B2C markets, consumer behavior is the primary driver.

When you understand what customers want and how to motivate them to make a purchase, you'll have success. That drive is what built the B2C sector, but that means it's also one of the major challenges for any business entity working in B2C.

Identifying what customers want and deciding how to distinguish your products or services from those of other vendors are major interests for market research and R&D divisions in the 21st century.
