Using eco-friendly products is not only better for the environment, but it's also better for your health. Since these items are made from natural or recycled materials, they don't contain the same harsh chemicals and toxins that traditional products do. To spread the awareness of using Ecofriendly products and benefits of using them, "Plastic Free Day " was observed in ASM's CSIT College. On the occasion the students and faculties prefer to use steel lunch boxes and bottles . There was active participation of Faculty and students for this initiative.
